Summary Statistics

Total Claims	Verified	Inaccurate	False
5	2	0	3

Detailed Verification Results

Claim #1: ■ VERIFIED

Claim: The Earth revolves around the Sun.

Type: TECHNICAL

Page: 1

Confidence: 95%

Analysis: Multiple authoritative sources (Britannica, NASA, and Wikipedia) explicitly state and explain that Earth revolves around the Sun. Source 1, Source 2, Source 3, and Source 4 all confirm this fundamental astronomical fact, detailing the elliptical orbit and the approximate duration of one revolution (about 365.25 days). Source 5, while a Reddit discussion, also affirms the core claim while adding nuances about orbital variations.

2. Earth's orbit - Wikipedia - https://en.wikipedia.org/wiki/Earth%27s_orbit
3. Chapter 2: Reference Systems - NASA Science - <https://science.nasa.gov/learn/basics-of-space-flight/chapter2-1>

Claim #2: ■ VERIFIED

Claim: Water boils at 100C at standard atmospheric pressure.

Type: TECHNICAL

Page: 1

Confidence: 95%

Analysis: Multiple sources (1, 2, 3, 4, 5) explicitly state that water boils at 100°C (or approximately 100°C) at standard atmospheric pressure (often defined as 1 atmosphere or 101.3 kPa at sea level). Source 2 notes a more precise value of 99.97°C but confirms 100°C as the commonly given and

historically defined boiling point.

Claim #3: ■ FALSE

Claim: Humans can breathe normally underwater without equipment.

Type: TECHNICAL

Page: 1

Confidence: 100%

Analysis: All provided sources consistently state that humans cannot breathe normally underwater without equipment. Humans lack the necessary biological structures, such as gills, to extract oxygen from water. Any form of underwater respiration for humans requires specialized equipment (e.g., scuba gear, rebreathers, artificial gills) or involves holding one's breath (freediving), which is not 'breathing normally'.

Correct Information: Humans cannot breathe normally underwater without specialized equipment. Our lungs are designed to process air, not water, and we lack the biological mechanisms to extract oxygen from water.

Claim #4: ■ FALSE

Claim: The Moon produces its own light.

Type: TECHNICAL

Page: 1

Confidence: 100%

Analysis: All provided sources unequivocally state that the Moon does not produce its own light. Instead, the light we see from the Moon is sunlight that is reflected off its surface. Sources include an AI summary, an educational platform (Filo), an astronomy social media account, the Lunar and Planetary Institute, and NASA Science, all in agreement.

Correct Information: The Moon reflects light from the Sun; it does not produce its own light.

Sources:

Claim #5: ■ FALSE

Claim: The Great Wall of China is visible from space with the naked eye.

Type: TECHNICAL

Page: 1

Confidence: 95%

Analysis: Multiple reputable sources, including NASA and astronaut testimonies, consistently state that the Great Wall of China is not visible from space with the naked eye. While it can be captured with high-resolution satellite imagery or telephoto lenses, its narrow width makes it imperceptible without magnification.

Correct Information: The Great Wall of China is not visible from space with the naked eye; it can only be seen with magnification through cameras or high-resolution satellite imagery.
